**Junior Full Stack Developer with experience building and deploying real-world web applications, including airline booking, CMS, and enterprise management systems. Skilled in React, Node.js, and PostgreSQL, with strong focus on backend architecture, API design, and scalable system development. Experienced in authentication systems, reverse proxy deployment, and end-to-end application delivery.**

## Freelance Projects (2024–Current)

### Real-Time Airline Booking Platform

GitHub: [github.com/Khant26/AirTicket\\_Frontend\\_FlyQM](https://github.com/Khant26/AirTicket_Frontend_FlyQM)

- Developed a real-time airline booking platform with dynamic flight search and step-by-step booking workflow
- Implemented secure JWT-based authentication and protected routes for user-specific data
- Designed RESTful APIs for booking logic, pricing calculation, and data handling
- Configured reverse proxy (e.g., Nginx) for routing and deployment architecture
- Implemented global state management for booking flow and user sessions
- Built interactive UI with loading states, error handling, and booking confirmation flow
- Integrated currency conversion for international booking support
- Implemented user-specific booking history and protected routes for secure data access

### Enterprise Management System (ERP-style)

GitHub: [github.com/Khant26/company-management](https://github.com/Khant26/company-management)

- Built an internal enterprise system with role-based access control and permission handling
- Developed modules for employee management, performance tracking, and reporting
- Implemented meeting and event scheduling features for organizational workflow
- Designed backend services for business logic and data processing
- Created admin dashboard with role-based views and system monitoring

### Event Booking & Ticketing Platform

GitHub: [github.com/Khant26/Ticketany\\_Frontend](https://github.com/Khant26/Ticketany_Frontend)

- Built a full-stack event booking platform with authentication and user roles
- Implemented ticket booking, event creation, and user dashboard features
- Designed backend APIs for booking logic and user data management
- Added validation and error handling for booking operations

### Content Management System (CMS)

GitHub: [github.com/Khant26/cms\\_frontend](https://github.com/Khant26/cms_frontend)

- Built a CMS using React, Tailwind CSS, and Django
- Developed admin dashboard for managing blogs and project content
- Implemented role-based access control and RESTful APIs
- Deployed frontend on Vercel and backend on Render

## Work Experience

### Testautomation Engineer – Brillar Company(Early 2025)

- Built and executed automated test cases using Tosca, reducing manual testing effort
- Detected and reported critical bugs, contributing to improved application stability and performance
- Performed regression and functional testing to ensure consistent system behavior across releases
- Collaborated with developers to optimize testing workflows and improve CI/CD quality assurance process

### FullStack developer – Civil Master Solution (2025–2026)

- using React, Tailwind CSS, and Django
- Built an admin dashboard to manage blogs and project portfolios
- Implemented role-based access control for secure content management
- Designed RESTful APIs for content creation, editing, and publishing
- Integrated dynamic UI components for blog display and project showcase
- Deployed frontend on Vercel and backend on Render

## Education

**Rangsit University 2023–2026**

Bachelor of Science in Information and Communication Technology (ICT)

## Expertise

### Hard Skill

- Languages: JavaScript, Python
- Frontend: React.js, Tailwind CSS
- Backend: Node.js, Express.js, Django
- Databases: PostgreSQL, MongoDB
- Tools: Git, REST APIs, Tosca, Reverse Proxy (Nginx)

### Soft Skill

- Problem Solving
- Team Communication
- Time Management
- Critical Thinking
- Project Management
